

LED MIRROR INSTALLATION INSTRUCTIONS

IMPORTANT

- All LED mirrors must be installed by a qualified electrician accordance with AS/NZC 3000 wiring rules.
- All LED mirrors are suitable for bathroom and non-bathroom areas/dry areas. Not suitable for above baths or installation in saunas or shower cubicles.
- Never cover LED mirrors when switched on and always switch off when not in use.
- Do not leave on for prolonged periods.

Prior installation

It is important that the product is unpacked and inspected for any damage, defects and that the product supplied is correct. If any of the above is apparent, **DO NOT PROCEED**

WITH THIS INSTALLATION, AND IMMEDIATELY CONTACT THE STORE OF PURCHASE.

INSTALLATION STEPS

1. Using measuring tape and spirit level mark out desired position for the mirror. Mark the mounting holes on the wall to match the bracket holes on the mirror.
2. Ensure there are no water or electrical sources behind the fixing points and drill wall as per marking.
3. Insert screw anchors suited to the type of wall to which the mirror will be fixed. (Only screws in the case of wood studs) **Do not silicone the mirror on the wall.** It will avoid warranty.
4. Complete all required electrical connections in the included electrical junction box and hang the mirror on screws.

OPERATING INSTRUCTIONS:

: **Point-press**—Light and Defog on/off; **Long-press**—Infinity Brightness Dimmer

When the power is turned off and then restarted, it will return to the previous state of use.

MAINTENANCE AND CARE

Clean your mirrors using methylated spirits and water a ratio at 30% methylated spirits and 70% water. Please avoid getting water on the back and sides of the mirror as damage to silver backing can occur. **DO NOT USE HARSH WINDOW CLEANERS.** We also recommend if you live in coastal areas wiping around the edge of the mirror once a month to avoid salt built up that can cause silver creep.
